

## SMOKING POLICY AT NORDFYNS HØJSKOLE

The smoking policy is an overall framework that reflects the school's effort to become a smoke free school. This effort is based on the intention of creating a healthy environment at the school that contributes to the wellbeing of the staff and students and makes room for everyone (student, staff, guest) to enjoy the space without being exposed to secondhand smoking. The policy is developed with foundation in current Danish legislation, the intention of a healthy working environment at the school and the school values and applies to all staff, students, attendants of short term courses and guests at our school.

No smoking or other use of tobacco products (including, but not limited to, cigarettes, e-cigarettes or vaping devices, pipes, shisha, cigars etc.) is permitted in any part of the school buildings.

Students and guests who smoke are referred to use the two outdoor smoking areas by 'nr. 18' and the recycling station next to the main building

Staff who smoke are referred to use either the two above mentioned areas or the front lawn by the staff room.

The smoking policy can be waived at special occasions.
